Shawn Angel Ramos

ramosshawnangel@gmail.com | Manila, PH | linkedin.com/in/sramos006 | github.com/Sramos06

EDUCATION

Polytechnic University of the Philippines **Expected 2028**
B.S. Information Technology *Manila, PH*

- Honors: **President's Lister** (1st Year, AY 2024–2025); **Dean's Lister** (2nd Year, AY 2025–2026)
- Relevant coursework: Object-Oriented Programming (Java), Information Management (SQL/MySQL), Data Analytics (Python), Web Development, Probability & Statistics

PROJECTS

PAMS-OUS: Personnel & Task Management System **2026**
Team project, Information Management course | Node.js, Express, MySQL *GitHub (org)*

- Wrote the frontend core (window.PAMS) that every page of the final app runs on: session handling, auth guards, page navigation and the shared API helper.
- Built the first working versions of Tasks, Reports, Groups and email OTP login, which set the feature direction the team's final build followed.
- In my own build, wrote about 2,500 lines of Express backend: a role and permission system, notifications, a migrations engine and an SMTP mailer for OTP codes.

Fitness & Health Tracking Analytics **2026**
4-person final project, Data Analytics course | Python: pandas, numpy, scipy, matplotlib

- Designed and generated the simulated fitness dataset (workouts, vitals, activity logs with realistic distributions) that powered the team's statistical tests and matplotlib visualizations.

Repaso: Study Hub Web App **2026**
Personal project | Next.js, Vercel, Neon (Postgres)

- Planned, designed and tested a progressive web app for my interactive reviewers and notes, released up to v2.1: offline access, study stats with day streaks and four themes, on a zero-cost stack (Vercel + Neon serverless Postgres).

Simple Ordering System **2026**
Final project, Object-Oriented Programming course | Java, Swing

- Designed and built the complete desktop UI for an ordering system on top of an existing MVC backend, wiring Swing views to the controllers without modifying backend logic.

Clinic Appointment System **2025**
Personal project | Java *github.com/Sramos06*

- Java application for booking and managing clinic appointments; public repository on GitHub.

WORK EXPERIENCE

Remotasks **2020 – 2021**
Freelance Data Annotator *Remote*

- Completed paid image-annotation and data-labeling tasks (bounding boxes, categorization) on the Remotasks crowdwork platform.

SKILLS & INTERESTS

- **Languages:** Python, Java, JavaScript (Node.js/Express), SQL (MySQL), HTML/CSS; currently learning C++ and React/Next.js
- **Tools:** Git & GitHub, pandas/numpy/scipy/matplotlib, MySQL Workbench, VS Code, Figma, Microsoft Excel
- **Interests:** Game development (Roblox Studio); building study tools; reading novels; anime, movies and games
